# DETAILED ACTION

# **EXAMINER'S AMENDMENT**

Authorization for this examiner's amendment was given in a telephone interview with Paul Tully on March 15, 2004.

The application has been amended as follows:

# In the Claims:

- a. Claim 5, line 1 replace "1" with --2- after "claim".
- b. Claim 5, line 3 delete "body" after "latch".

#### In the Abstract:

c. Delete from lines 5-9 the sentence - "Latching portions of the ...locking point substantially simultaneously".

3. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach or suggest the applicant's invention as claimed in detail wherein an elongated latch rod having a proximal end and a distal end, said latch rod being supported in the first body component for sliding lateral movement between a release position wherein the latch rod does not engage the flange bores, and a latched position wherein the distal end of the latch rod slidingly engages the first flange bore and the proximal end of the latch rod slidingly engages the second flange bore when the box is in the closed position, the latch rod being disposed relative to the support such that the padlock body blocks the longitudinal movement of the proximal end of the latch rod and maintains the latch rod in the latched position when the body components are in the closed position and the padlock is locked, and the proximal end of the latch rod to the release position when the padlock is unlocked, and the handle as claimed in detail.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/606,986
